Dated the 23rd June 1953.

Secy.. Health.
Please examine and put up.
secretary 24/6

Dear Sir,

I have sent up a proposal to Govt. for appointing a full-time medical officer for leprosy work in the Shiroda area. I enclose a copy of my letter to the D.M.S. I hope my proposal will find favour with Government

with respectful regards

Yours very Sincerely

T.N. Jagadisan

The Director of Medical Services,
Madras 6.

Sir,

Sub: Leprosy survey in Shirva area- Proposal for appointing a full-time medical officer for leprosy work in the area.

Ref: Your letter Ref.40905-5 G2 dated 27-5-53

In 1947 I visited the Shirva area. Subsequently Dr.R.G.Cochrane the then Honorary Director of Leprosy Campaign visited this area. He suggested a complete survey of Shirva and the adjoining villages and the institution of prevnetive and curative measures, in the area. The Government appointed a special leprosy health inspector for Shirva area in G.O.No.1326 P.H dated 15-4-50 He jointed duty on 21-12-50 and worked till April 1952 carrying out a thorough investigation into the incidence of leprosy in the area. Shirva and 19 adjoining villages within a radius of five miles comprising a population of 54,562 were taken up for extensive survey. An intensive survey of Shirva village was also done. A total of 185 leprosy cases was discovered in the area of which 68 were of the infective type. Various statements and two maps prepared by the Special Leprosy Health Inspector on the leprosy situation in Shirva are appended. I make bold to say that probably we have in these statements the most detailed investigation of leprosy possible for any area and the Health Inspector's work has provided an admirable background for very precise curative and preventive measures. Now that we know almost every case of leprosy in this area and now that we have a drug of potency in D.D.S it would be a wasting of a golden opportunity if we do not follow-up the valuable survey work done here with treatment and control work. That the incidence in the area is not so high as in other endemic districts should not be a reason for postponing adequate measures of control. On the other hand it should be a special stimulous for organising control measures and on a thorough basis for it is very happy to refl

in this area the disease is as yet within reasonable proportions and that therefore we are in a position to treat each and every case adequately and to keep the cases under proper observation and discipline. I was associated with the proposals about appointing the special leprosy health inspector for Shirva and the idea behind the proposal was that we should get at a very detailed picture of incidence in the area and then follow it up with control measures.

It is fortunate that in South Kanara generally and in Shirva in particular there is commendable leprosy consciousness. During the last few years local conferences have been held in Shirva and Udipi demonstrating a desire on the part of the people to tackle the leprosy problem in the area and to cooperate with Government in any efforts that they might take to tackle it. The Hind Kusht Nivaran Sangh of which Dr.Coelho of the Kankannady leprosy hospital is the Secretary and the District Collector is the President is also evincing keen interest in the matter of organisation of treatment and control measures of leprosy in Shirva and the surrounding villages, this area being the most endemic in the South Kanara district. A Sub Committee of the Sangh has decided that the treatment and control work in Shirva and neighbouring villages should be entrusted to a whole-time medical officer and has made a request to the Honorary Secretary, Hind Kusht Nivaran Sangh (Madras State Branch) to endeavour to obtain for leprosy treatment and control work in the Shriva area a full-time medical officer. The South Kanara Branch of the Sangh has undertaken to arrange for a Sevak and a nursing orderly to help the medical officer and to supply all the drugs. The people of Shirva have time and again assured their full cooperation and assistance in this work. I therefore request that the Director of Medical Services may be pleased

7

to recommend to Government my proposal for appointing a full-time Civil Assistant Surgeon to be in charge of the Shirva area leprosy treatment and/control scheme, the scheme to be developed and financed by the South Kanara District Branch of the Hind Kusht Nivaran Sangh. The ~~Medical officer~~ Civil Assistant Surgeon will be under the administrative control of the District Medical Officer.

As very precise work ~~needs to~~ can be done in an area like this about which we have such detailed information, it may not be necessary to employ a full-time doctor for leprosy work for more than a period of 5 to 7 years. I wish to repeat that now that we have a drug that ~~might~~ can bring down the infectivity of cases very considerably in a year or two thereby rendering them harmless to their contacts it is really cheaper ~~in~~ from the long range point of view to spend money on schemes of leprosy control in the course of this decade for with intensive efforts we can now reasonably hope to diminish the disease to a ~~gxx~~ great extent.

Yours sincerely,

T.N. Pagadisan

Honorary Secretary.

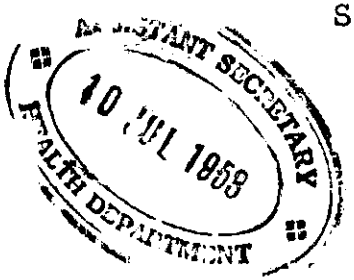
Ref. No. 40905-6 G2 dated 8-7-53.



Sir,

Sub:- Leprosy - South Kanara District, Shirva - Appointment of a full time Medical Officer for leprosy work.

Ref:- Government Memo. No. 34353-L/53-1 Health dated 26-6-53.

A copy of letter dated 17-6-53 from the Honorary Secretary, Hind Kusht Nivaran Sangh (Madras State Branch) is forwarded.

In the circumstances reported by the Honorary Secretary, it is requested that the Government may be pleased to sanction the appointment of a full time civil assistant surgeon to be in charge of the Shirva area leprosy treatment and control scheme as the expenditure on account of the appointment of the medical officer will be met by the South Kanara District Branch of the Hind Kusht Nivaran Sangh and no extra expenditure will be incurred by the Government.

Yours faithfully,

R.G.8-7. for Director of Medical Services.

Sir,

Sub: Leprosy survey in Shirva area- Proposal for appointing a full-time medical officer for leprosy work in the area.

Ref: Your letter Ref.40905-5 G2 dated 27-5-53

In 1947 I visited the Shirva area. Subsequently Dr.R.G.Cochrane the then Honorary Director of Leprosy Campaign visited this area. He suggested a complete survey of Shirva and the adjoining villages and the institution of prevnetive and curative measures, in the area. The Government appointed a special leprosy health inspector for Shirva area in G.O.No.1326 P.H dated 15-4-50 He jointed duty on 21-12-50 and worked till April 1952 carrying out a thorough investigation into the incidence of leprosy in the area. Shirva and 19 adjoining villages within a radius of five miles comprising a population of 54,562 were taken up for extensive survey. An intensive survey of Shirva village was also done. A total of 185 leprosy cases was discovered in the area of which 68 were of the infective type. Various statements and two maps prepared by the Special Leprosy Health Inspector on the leprosy situation in Shirva are appended. I make bold to say that probably we have in these statements the most detailed investigation of leprosy possible for any area and the Health Inspector's work has provided an admirable background for very precise curative and preventive measures. Now that we know almost every case of leprosy in this area and now that we have a drug of potency in D.D.S it would be a wasting a golden opportunity if we do not follow-up the valuable survey work done here with treatment and control work. That the incidence in the area is not so high as in other endemic districts should not be a reason for postponing adequate measures of control. On the other hand it should be a special stimulus for organising control measures early and on a thorough basis for it is very happy to reflect that in

in this area the disease is as yet within reasonable proportions and that therefore we are in a position to treat each and every case adequately and to keep the cases under proper observation and discipline. I was associated with the proposals about appointing the special leprosy health inspector for Shirva and the idea behind the proposal was that we should get at a very detailed picture of incidence in the area and then follow it up with control measures.

It is fortunate that in South Kanara generally and in Shirva in particular there is commendable leprosy consciousness. During the last few years local conferences have been held in Shirva and Udipi demonstrating a desire on the part of the people to tackle the leprosy problem in the area and to cooperate with Government in any efforts that they might take to tackle it. The Hind Kusht Nivaran Sangh of which Dr.Coelho of the Kankannady leprosy hospital is the Secretary and the District Collector is the President is also evincing keen interest in the matter of organisation of treatment and control measures of leprosy in Shirva and the surrounding villages, this area being the most endemic in the South Kanara district. A Sub Committee of the Sangh has decided that the treatment and control work in Shirva and neighbouring villages should be entrusted to a whole-time medical officer and has made a request to the Honorary Secretary, Hind Kusht Nivaran Sangh (Madras State Branch) to endeavour to obtain for leprosy treatment and control work in the Shriva area a full-time medical officer. The South Kanara Branch of the Sangh has undertaken to arrange for a Sevak and a nursing orderly to help the medical officer and to supply all the drugs. The people of Shirva have time and again assured their full cooperation and assistance in this work. I therefore request that the Director of Medical Services may be pleased

59 15

to recommend to Government my proposal for appointing a full-time Civil Assistant Surgeon to be in charge of the Shirva area leprosy treatment and control scheme, the scheme to be developed and financed by the South Konara District Branch of the Hind Kusht Nivaran Sangh. The ~~Medical officer~~ Civil Assistant Surgeon will be under the administrative control of the District Medical Officer.

As very precise work ~~needs to~~ can be done in an area like this about which we have such detailed information, it may not be necessary to employ a full-time doctor for leprosy work for more than a period of 5 to 7 years. I wish to repeat that now that we have a drug that ~~might~~ can bring down the infectivity of cases very considerably in a year or two thereby rendering them harmless to their contacts it is really cheaper in the long range point of view to spend money on schemes of leprosy control in the course of this decade, for with intensive efforts we can now reasonably hope to diminish the disease to a great extent.

Yours sincerely,

T.N. Jagadisan

Honorary Secretary.

General Remarks:

Economic status.

Average monthly expenses per head are ranging from Rs.8 to 12.

Sanitary conditions:- Houses stand isolated at a distance of 2 to 6 furlongs or even more with a lot of open space in front of each house. Sanitary conditions are fairly satisfactory.

Notes on investigation:- Every member of the house-hold was thoroughly examined including ladies as far as possible without offending their sentiments and decency. Examination was carried out by going house to house. High rate of absentees is due to constant movement of the population between the husbands home and uncle's house. It would have been possible to examine 90% of the population if notices had been served beforehand through a peon and arranged the collection of all members of the house hold.

24.6.'53

The proposal in this file relates to the appointment of a full time Medical Officer for leprosy work in Shirva, Village South, Kanara Dt.

2 Dm. G.O. No 1326/H d. 15-4-50 the Govt. sanctioned the deputation of one Health Inspector to the L.V.L. Sanatorium, Jivanmane and the Silver Jubilee Children's Clinic, Saidapet for a period of three months for training in leprosy survey and social welfare work. They ordered that on satisfactory completion

of his training he will be appointed as Special Leprosy Health Inspector at Shirva villages. temporary — p 57 cl (V)

3. It is reported that the Soulli Kamara Dt Branch of the H.K.N.S is taking keen interest in the matter of organisation of treatment and control measures of leprosy in Shirva and its surrounding villages. this area is being the most endemic in the Soulli Kamara Dt. The Dt Branch of the Sangh has decided that the treatment and control work in Shirva and neighbouring villages should be entrusted to a whole time Medical officer and has made a request to the Hony Secy H.K.N.S to endeavour to obtain a full time Medical officer for this purpose the Hony Secy H.K.N.S and the Dt N.S recommend the appointment of a full time Asst Surgeon to be in charge of the Shirva area leprosy treatment and control scheme. It is reported that there — 'C' m — p 14 cl — 11 — 'C' m p 15 cl — p 14 cl

Encl II

p 11 c6

will be no extra expenditure to Govt on account of the proposed as the entire control scheme will be financed by the Sungei Kanana Br of the H.K.N.S. The proposal of the D.M.S for the appointment of a full time Asst Surgeon for the purpose may be approved

ASSISTANT SECRETARY 43025 7 AUG 1953 HEALTH DEPARTMENT

MEDICAL DEPARTMENT.

From

Lt. Col. Sangham Lal, MBBS, FRCS., DOMS.
Director of Medical Services, Madras. 6.

The Secretary to Government, Health Department, Madras.

P.No.163-G2 dated 25-9-1953.

Sir,

Sub:- Leprosy - South Kanara District - Shirva Village - Deputation of a Assistant Surgeon for leprosy work - Sanctioned.
Ref:- G.O.No.3111 Health dated 19-8-1953.

52742

The Honorary Secretary, Hind Kusht Nivaran Sangh (Madras State Branch) reports that the South Kanara branch of the Hind Kusht Nivaran Sangh have intimated to him that Dr. Naik of Shirva who is very enthusiastic in leprosy work and who is being trained in leprosy will do the leprosy work in the area. A *copy of his letter dated 15-9-1953 is enclosed for the information of Government.

Yours faithfully,

Tpk.25/9.

For Director of Medical Services.

*Copy of letter:

Ref:- G.O.No.3111 Health dated 19-8-53.

I request Government not to give effect to the orders cited above as the South Kanara branch of the Hind Kusht Nivaran Sangh have intimated to me that since my proposal was sent Dr. Naik of

p.t.o.

of Shirva who is very enthusiastic in leprosy work and who is being trained in leprosy will do the leprosy work in the area.

/ True Copy /
